

Cut Your Pizza

G Bm C Am

G Bm C D

There are problems in the world,
But nothing's going to happen,
There's an problem right in front of us,
It's when you cut a pizza into eight slices,

Some are big and some are strange
If we don't try to make a change
that some people can't see:
It can't be shared by three

There's no even way to split it
Two people get three slices
They're always cut into eight
But if you cut pizza into twelve slices

when there's three of you
one is left with two
the division isn't fair
there'd be enough to share

$\frac{1}{2}$ G Bm C D (x2)

$\frac{3}{4}$ G Bm Em Em C D

**Cut your pizza into twelve
Cut your pizza into twelve
Cut your pizza into twelve
Cut your pizza into twelve**

**It's divisible by four and three
A fair share for two friends and me
Then we'd get four slices each
Equality's not out of reach**

G Bm C Am

G Bm C D

It's not just about three friends.
Who get unfair shares of slices
This isn't hard to understand,
Coz with a twelve slice system,

It's also about six mates
When a pizza's cut in 8.
I hope the message is getting thru
You and five friends.. all get two

Maybe you're wondering
Well order at least two pizzas
Whether from the takeaway,
Portions are perfectly parallel
Twelve, Twelve, Twelve

"What about groups of eight?"
You mean cheapskate
Or straight out of the oven
When you dissect by the dozen

Cut your pizza into twelve Capricosa or Calzone
Cut your pizza into twelve Pollo or Pepperoni
Cut your pizza into twelve Chef's Special or Fungi
Cut your pizza into twelve Then we can bridge this great divide.

Cut your pizza into twelve Margherita or Vegetarian
Cut your pizza into twelve To be truly egalitarian
Cut your pizza into twelve Even when it's Hawaiian
Cut your pizza into twelve This is how we make a great Britain!
