

# AI for School Staff

Artificial intelligence will change our pupils' future. Schools around the world are considering how it can improve both pupil outcomes and staff workload, given that it can already:

- Write schemes of work
- Assess pupil work
- Adapt resources for children with SEND.

If used well, artificial intelligence (AI) will transform pupil outcomes. But where will schools begin? What are the benefits and risks?

## **Delegates will:**

1. Better understand AI and the options that are already on your device and that of other staff, parents and pupils.
2. Consider how AI can be used by staff to improve standards and reduce workload.
3. Understand how you can support development; for both school and yourself.

Delivered by Aaron King, education advisor (9000lives.org) and teacher.

## **Audience**

All staff and school leaders (max number 50). School governors are also welcome to attend.

## **Benefits**

By offering this training, attendees will find ways to enhance teaching and learning and reduce workload.

## **Previous feedback**

- "I think this session should be provided to all teaching staff."
- "This was a really interesting session and the speaker was great."
- "Mind blowing!"

## **Location**

- This can run face-to-face anywhere.
- Wi-fi, projector & connected laptop are required.

## **Length**

- 2 hours (including break)
